Tip It's fun to take this into Photoshop Live here: * ` Photoshop CS5 comes with a free month of subscription to Photoshop Pro Plus, a Photoshop Essentials version of Photoshop. It has all the tools of CS5 minus some features. The Essentials version does not include layers, only single document layers (which are not very helpful for professionals). It does, however, have a few of the most popular image processing filters from Photoshop CS5.

The discovery of a previously unknown bug in the bitcoin blockchain — which the company claims is “tentatively the worst vulnerability in the world” — is likely to catch the attention of regulators worldwide, as well as concerns that the Russian government will try to use the bug to stifle cryptocurrencies. The discovery by an East German cryptography expert, who has not been named or revealed his background for security reasons, will initially be kept secret to preserve the anonymity of the researcher. The bug, discovered by a team of four at a risk consultancy firm called White Ops, and reported to a leading bitcoin security firm, was in an ancient program, called the “getbestblock” function in the bitcoin source code, written at the beginning of 2013.

According to White Ops, the code “can be used by a malicious peer in a coordinated fashion to modify transaction and block balances on the network.” The bug only affects a single bitcoin blockchain version, version 0.8, which was released in December 2013. When this code was released, there were only 21 million bitcoins in existence. The existence of an unlimited supply of this type of cryptocurrency was a principal driver of bitcoin’s immense recent appreciation, and the adoption of bitcoin by the Russian government was one of the big drivers of this appreciation. This

bug means that bitcoin was released with a bug that allows somebody to control billions of dollars' worth of the bitcoin network. The discovery of this bug has drawn sharp criticism of the bitcoin network from the bitcoin developer Gavin Andresen, who is the director of the Bitcoin Foundation. ◆

What's New in the?

Agreed. he would be nice on any contending team, I doubt he leaves the B#U because of the coaching staff, and on a rebuilding team he wouldn't get much playing time. Best fit would be in Cleveland, but not only is there no coaching staff in place yet, they also don't have much cap space. I don't know how significant his starting role would be in Cleveland, but I'd love to see him at RB, and it'd be great to have him on our team as a backup RB if you're worried about his pass blocking. I think Royce Freeman would be a good fit. Between the Freeman, Spencer Ware and Terrance West as RB4's. We'd need to find a way to get them more reps though. Royce should not be in this position and I'm not going to believe a Lions fan until we have a GM that is willing to pay top money in the draft and/or free agency for a mobile back that has proven he can run. I'm not a Freeman fan. I say get him out of there before the player demands a trade. better back than Marion Barber or Mikel Leshoure, which should be enough to have him on the roster next season.
