123 Bulk Email Direct Sender Crack +

123 Bulk Email Direct Sender is an easy-to-use yet powerful software tool that allows you to send emails to multiple addresses. It can be helpful when it comes to newsletters, for example. Simple user interface The UI of the program is made of a common window with a well-organized layout. You can add recipients by writing each email address individually or by importing a plain text document (TXT). It is possible to attach and add URLs files to emails, as well as to view error messages regarding the connection. The detailed "sent" list may be exported to a TXT, XLS, CSV or TSV file; you can also make the app remove duplicated addresses from this list. Lets you configure various parameters Several configuration options are available through the Settings area. For example, you can edit the primary and secondary DNS, as well as specify the number of threads along with the timeout and number of retries. But you can also create an email exclusion list, configure proxy settings, enable 123 Bulk Email Direct Sender to send emails via an SMTP server after inputting your account credentials, as well as point toward the outgoing SMPT port. Settings can be restored to their default values. Low resource consumption The application is low-demanding when it comes to the CPU and system memory, so it shouldn't concern your computer's resources. It has a good response time and is backed by a help file. All things considered, 123 Bulk Email Direct Sender is a lightweight application that can help you send multiple email messages to several recipients at the same time. It comes with a simplistic, unattractive user interface and doesn't require high-end computers to run. No error dialogs have been shown in our tests and 123 Bulk Email Direct Sender did not hang or crash. Key features: • Send emails to multiple addresses • Support for web forms and HTTP Get/Post requests • Large file support (up to 10MB) • Support for import and export (XLS, CSV, TXT) • Scan quickly, using a direct approach • Powerful API Main features: • Can send up to 100k emails a minute • Can send multiple emails to multiple addresses • Can attach files/URLS/email formatting • Supports all protocols • Various customizable settings • Shows detailed information on every sent email • Automatically removes duplicated recipients 123 Bulk Email Direct Sender - By OhMagic b7e8fdf5c8

123 Bulk Email Direct Sender

Send Emails to Multiple Addresses by Group and Create Pristine emails! 123 Bulk Email Direct Sender helps you send bulk email without subject lines, attachments or other unneeded parts. 123 Bulk Email Direct Sender allows you to send email messages to multiple email addresses, which can be organized into unlimited folders. Enter email recipients by typing in their addresses, or import a text file containing the recipient list. Click "Send" to start the process, and email will be sent to every address. You can also use several programs to send the same email message through the same sender and recipient address (using accounts and groups). Get rid of your email client, and get rid of the original message and attachments! Start sending bulk emails in seconds! 123 Bulk Email Direct Sender installs in minutes, and will allow you to send unlimited email messages for free! Simple, intuitive user interface 123 Bulk Email Direct Sender supports sending messages to multiple email addresses with a few clicks, and will allow you to quickly set up, save, and send the same email message with several accounts. Add recipient addresses by typing in the email addresses one by one, or import a text file containing the address list. Attach files to the email messages, or point them to a URL. A reminder will notify you when messages need to be sent, and it will keep you posted on each status. You can also configure sent emails that are saved in a TXT file, XLS file, CSV file or TSV file. After the process finishes, the program will send a notification email and show you the total number of sent emails (with emails count information). A clickable list of your email recipients is also available in a separate window to help you find your email addresses. 123 Bulk Email Direct Sender runs very quickly, and it is backed by a well-written user guide. Lets you configure various parameters You can configure various parameters for your emails by going to the Settings menu. Set the system-wide primary and secondary DNS servers, as well as specify the maximum number of threads and retries. If you set these settings correctly, you can let 123 Bulk Email Direct Sender automatically send the same email message to multiple recipients at the same time. Turn on SMS Sending. You can also add an email exclusion list, configure proxy settings, and enable it to send emails via SMTP servers after inputting your account credentials. Drawbacks There is

What's New In 123 Bulk Email Direct Sender?

123 Bulk Email Direct Sender is an easy-to-use yet powerful software tool that allows you to send emails to multiple addresses. It can be helpful when it comes to newsletters, for example. Simple user interface The UI of the program is made of a common window with a well-organized layout. You can add recipients by writing each email address individually or by importing a plain text document (TXT). It is possible to attach and add URLs files to emails, as well as to view error messages regarding the connection. The detailed "sent" list may be exported to a TXT, XLS, CSV or TSV file; you can also make the app remove duplicated addresses from this list.
